**Uber Pickups in NYC**

kaggle.com

For my individual project, I plan to explore how New Yorkers navigate NYC using Uber and other for-hire Vehicle (FHV) services.

The data contains Uber pickups from 2014 to 2015 and trip data from 10 other services varied by date, location details and companies.

One question I have is: how the time or date relates to the number of Uber pickup in NYC and which area uses Uber most frequently.
